

## Catalog.

It is now possible to reserve items from the Search Results page. If there are available holdings, a Hold transaction will be created on the first available holding. If all the holdings are unavailable, a Reserve transaction will be created.

2. The Booking experience has been improved.
3. When adding new Recommended Reading items they will now be inserted at the beginning of the list.
4. Emailing the List (Bookbag) will fall back on the sender value in Global.ini, if the library\_mailto is undefined.

1. Customized email notifications will now be saved under the Installation, so each Library can have separate customizations.

1. An error that allowed Record Editor to purge patrons with open transactions in secondary databases has been resolved.
2. Issues in non-scoped data where invalid data in 852#a could prevent saving a holding record, or produce detached barcodes, have been addressed.

We hope these new Mandarin M5 features enhance your and your patrons' experience.

Please keep your suggestions coming and as always, we appreciate your ongoing support.
